EDUCATION BACKGROUND

Shanghai Jiao Tong University | Master of Digital Cultural Creation and Management Shanghai, Sep 2025-Mar 2028

- **GPA:** 3.80/4.0 (Top 5%)
- **Merit-based Scholarship:** RMB 108,000; ranked No. 1 in the postgraduate recommendation program

Xiamen University | Bachelor of Accounting

Xiamen, Sep 2021-Jun 2025

- **GPA:** 3.63/4.0 (Top 3%)
- **Awards:** Academic year 2021-2022 & 2022-2023 University-Level Scholarship (Top 15%), Dean's List (Top 5%)

PROFESSIONAL EXPERIENCE

Samsung Ventures | Investment Analyst Intern – AI Infrastructure & Semiconductors Shanghai, Aug 2026-Present

- **Supported Samsung's global team in evaluating investment opportunities across SEA and Greater China's AI value chain**
 - Sourcing investment opportunities covering advanced packaging technologies (TPV, hybrid bonding), AIDC infrastructure (SST, Liquid Cooling), and embodied AI, contributed to the due diligence and IC memo for a leading AIDC SST company
- **Supported AI transformation initiatives for Samsung Ventures by developing and deploying AI-enabled investment tools**
 - Built a weekly news-analysis and briefing workflow and a business-plan language converter, and contributed to a daily TMT and semiconductor distro analysis, presented the tools to global colleagues and supported their adoption in recurring research processes.
- **Conducted supporting research on AI-agent business models and inference economics**
 - Used VitaBench to benchmark leading foundation models across travel booking, food delivery and complex Q&A tasks, compared token consumption and cache-hit rates to assess how evolving token economics could reshape AI hardware and software value chain

NIO Capital | Investment Analyst Intern - AI Software & Hardware

Shanghai, Dec 2025-Mar 2026

- **Conducted industry research and due diligence on multimodal video generation Application and Foundation Model**
 - Mapped key market participants and compared technology roadmaps; contributed to the investment thesis, business-model assessment, financial analysis and sector evaluation of the investment memo for a leading Chinese AI company
- **Performed frontier research on Neo Lab through arXiv, LinkedIn, and corporate disclosures**
 - Evaluated multimodal model capabilities, product roadmaps, and early-stage investment opportunities; sourced China-based Neo Lab targets and drafted for the investment report of a leading computer vision research Lab Spin out multimodal AI Startup

Eastern Bell Capital | Investment Analyst Intern - AI Infrastructure & Semiconductors

Shanghai, Jul 2025-Dec 2025

- **Conducted due diligence for two Chinese AIDC liquid cooling providers**
 - Conducted market research on the liquid cooling industry for High-Performance AIDC servers, covering global and domestic market sizing, multi-tier industrial chain dynamics, and critical delivery and deployment logistics
 - Analyzed industry KSFs, including cost leadership, core supplier relationships, and overseas expansion capabilities, to form conclusive judgments on future technological and supply chain trends, with valuation using comparable P/E multiples and exit IRR

Tencent | Business Analysis Intern - Cloud Strategic Management Center

Shenzhen, Sep 2024-Jun 2025

- **Participated in China's endpoint security market research in AI era, assisting in organization adjustments**
 - Analyzed China's ToC endpoint-security market in the AI era, benchmarking global markets across mobile and PC, assessed emerging risks from AI-native platforms and growth opportunities in AI-enabled security and security for AI for Tencent BP
- **Participated in AI Agent research initiative, supporting decision-making for new market opportunities**
 - Compared industry/functional distributions of Salesforce and Chinese ToB AI Agent use cases since 2025 via pivot tables, identified specialized domestic scenarios and market opportunities for AI model providers and cloud vendors

Boston Consulting Group | Consulting Project Assistant

Shanghai, Dec 2023-Aug 2024

- **Participated growth engagement project for an Optical Glass company, evaluating AR/VR optical waveguide industry**
 - Mapped strategic adjustments of metaverse AR/VR players, evaluated AI impact on AR/VR markets, analyzed upstream suppliers and market mainstream technical routes of optical waveguide for client's entry decision

SELECTED INVESTMENT RESEARCH & LEADERSHIP

U.S. Semiconductor Public Equity Research

Shanghai, Feb 2026-Present

- **Conducted investment research on Lam Research [LRCX] in the semiconductor front-end equipment market**
 - Synthesized channel feedback across Foundry, memory, and advanced packaging segments to evaluate market opportunities, LRCX's positioning in deposition/etching, and downstream relationships (vs. AMAT and TEL), supporting investment decision
- **Conducted investment research on Marvell Technology [MRVL], focusing on AI compute and connectivity**
 - Developed distinct investment theses for custom ASICs, scale-up interconnect and scale-out networking by assessing hyperscaler design wins, product roadmaps, competitive positioning, revenue-contribution timing and valuation implications

UBS 2026 Tomorrow's talent program | Leader - FinAI Track

Shanghai, Nov 2025-Jan 2026

- **Led the core development of an AI-powered document-to-code platform for quantitative strategy research and backtesting**
 - Built an agentic workflow using LangChain to extract and classify investment logic from research documents, translate it into executable strategy code, and automate backtesting, selected as a finalist to meet with global panel of UBS professionals

INTERESTS & SKILLS

- **Language:** Mandarin (Native), English (IELTS 7.0)
- **Technical Skills:** Excel, PowerPoint, Bloomberg, Capital IQ, Wind, Python, Stata, Tableau, Financial Modeling
- **Interests:** AI Applications, Travel, Guitar (Folk Music Grade 7), Football, Badminton
